This consignment represents the type and kind of purebred cattle we strive to produce and is one of the best females we have ever offered at public auction. Study the pedigree and you will see her maternal grand dam is HPF Victoria B396E, the high-selling open heifer calf at the historical Hudson Pines dispersal. "Vicki" has produced high-selling females across the country commanding top dollar with hammer prices of \$55,000, \$50,000, \$32,000, \$14,000, as well as three daughters averaging over \$40,000 in 2023. Vicki also sired the \$300,000 second high-selling bull from the Hartman Cattle Company Bull Sale in 2024. We purchased L18's dam private treaty from Werning's a few years ago when they partnered with King Cattle Company of Indiana on Vicki. She has since transitioned into our donor pen and we are very excited about her future. The genetics represented here do not present themselves very often and this heifer is worth the trip Brundidge.

This Copacetic daughter is a moderate-framed, stout, big footed, functional representation of an easy keeping beef cow. Her dam is a 1/2 blood W/C Bankroll daughter that had a tremendous amount of success on the tan bark and has transitioned very well to the production side of the business. L28 has an awesome disposition and was recently campaigned by a first-year showman.

This female is a very good example of why we recommend evaluating cattle on the hoof and in the pasture before placing any degree of confidence in an EPD or index value. L29's dam ranks as one of the best performing, easiest keeping, best uddered, and most phenotypically appealing cows we own - hands down. Her calves are standouts year after year. Yet, her index values suggest she should be on the first truck to the sale barn. We're a proponent of the fact that production and performance are measured in the pasture and on the scales, not on paper and indexes. L29 is similar to the type and kind of her mother. She is big-bodied, three-dimensional, sound, and has outperformed her contemporaries in growth and performance. We feel she has the potential to exceed her dam in terms of productivity and raising quality offspring. L29 is sired by the recently deceased WLE Copacetic E02 which only increases the marketability of the genetics represented here. If you're chasing numbers, keep turning the page. If you're searching for good, functional cattle, look no further.

Very attractive and functional 5/8's Copacetic daughter that has a tremendous amount of future. Her dam was always a crowd favorite and many-time champion. She has been very productive in the pasture since her retirement. Last year's bull calf was an absolute favorite of visitors to the farm. L73 is sound, good-footed, and checks all the boxes for a highly productive and profitable female.

The bottom side of L74's pedigree is very unique in terms of Simgenetics. Her maternal granddam is KNC Cabin Creek Sandy 905, a legend in the Angus breed. Sandy had a very productive and impactful sixteen year life producing a lineage of offspring that topped sales across the country. L74's Bankroll dam is a result of the only Sandy x Simmental mating ever performed. To say the genetics represented here are rare is truly an understatement! We purchased L74's dam private treaty from Werning's a few years back and have been pleased with her productivity and ability to produce quality offspring.

One of the phenotypic standouts of this year's bull crop, BCFL Reserve 810M will command your attention when you study him. He is square built, deep sided, and eye catching in his makeup, its hard to pick a hole in this stud. He leads the charge of the ultra-impressive LCDR Reserve 210J sons in this sale that will be admired by cattlemen all over. He came to weaning pen to mash the scales at 856 lb, weaning weight. On of the heaviest in this year's crop. Homozygous Polled

Of all the purebred baldy cows I've owned over the past 36 years of breeding Simmental cattle Wise-Tito stands at the top. Outcross to most genetics people are currently using. She produces feminine heifers with exceptional eye appeal.

Buy 3 of either SAM or BANKROLL embryo's. Guarantee 1 pregnancy each if done by certified embryologist.

STETSON

R & K Cattle strives on breeding to the top sires in today's world to produce top quality bulls and females. Our end goal is to breed to top indexing bulls whose calves excel in the feedyards for the commercial cattlemen. We produce females that work in the pastures to raise top quality calves year after year. We would love for you to stop by the farm and view our cattle anytime. We would like to invite you to the first Southeast Classic bull sale April 19th, 2025, in Greenwood, Florida. We also consign Bred heifers to the Southern Producers replacement heifer sale every August.

**Any questions please give us a call.
